

Glimakra Countermarch Loom for Sale

£1,000 ono

Collect from Farfield Mill, Sedbergh, Cumbria <http://farfieldmill.org>

- 2 warp beams, cloth beam - all with strong canvas aprons (40")
- 10 shafts and 10 treadles
- Plenty of texsolv heddles, cords and clips
- 3 stainless steel reeds (8, 10 and 12 dpi)
- lease sticks
- Raddle
- A selection of rug and ski shuttles

I have used this loom to weave yardage and scarves. Former owners have woven rugs, yardage for clothing, curtain and upholstery weight fabrics as well as finer and transparent pieces, scarves and shawls.

You could add a fly shuttle beater, though I have been able to weave comfortably without one. The previous owner advised that it can be converted to a computerised loom using Toika kit, but please contact the manufacturers to check this out.

The loom can currently be seen assembled at Farfield Mill, Sedbergh (15 mins from J37 on the M6 during opening hours 10.30-5pm daily). I am intending to break it up during May to make space for my replacement loom.

Please contact me to arrange a viewing as I'm not at the Mill every day.
